## CORE COMPETENCIES

- Full-stack app development
- React.js and State management
- Node.js & Express.js engineering
- MongoDB Schema Design  
(Indexing, querying, aggregation)
- MongoDB Admin (Compass)
- RESTful API integration
- Component drive UI/UX design
- Error Handling & Debugging
- Authentication (JWT & RBAC)
- CI/CD & GitHub
- Git (Branching & Collaboration)

## SECONDARY COMPETENCIES

- Postman (API consumption)
- Frontend Libraries (MUI, Shadcn)
- WordPress
- CSS/SCSS
- Deployment (Netlify)
- Deployment (Netlify)

## EDUCATION

### BACHELOR'S DEGREE

Shenyang Institute of  
engineering  
2018 – 2022

MongoDB fundamentals  
Mongo University  
2023–2024

### JAVASCRIPT MASTERY

FreeCode Camp  
2023 – 2024

## PROFESSIONAL PROFILE

MERN stack developer with proven experience building scalable, production-ready applications using React, Node.js, Express, and MongoDB. Skilled in system automation, UI/UX implementation, and delivering enterprise solutions that improve operational efficiency.

## PROFESSIONAL EXPERIENCE

### MERN STACK DEVELOPER

FEB 2023– PRESENT

*Omnicontract, Econet Wireless*

- Led a team of 11 developers in building and maintaining enterprise-grade applications using the REACT and PostgreSQL.
- Designed and implemented **React.js front-end architectures**, focusing on component reusability, performance, and clean UI/UX patterns.
- Developed full-stack systems with **Node.js, Express.js, and MongoDB**, including HR automation tools and internal operational platforms.
- Engineered a secondment tracking system that improved HR workflow efficiency by **45%**, reducing manual processes significantly.
- Built a full stack SHE (Safety, Health & Environment) reporting platform supporting real-time incident logging and data visibility.
- Integrated authentication (JWT/session-based), validation, and secure API communication across internal systems.
- Collaborated cross-functionally with HR, SHE, and Operations teams to translate business requirements into scalable software solutions.
- Ensured software and internal systems adhered to **ISO standards**, improving audit readiness and operational compliance.
- Conducted code reviews, mentored junior developers, and enforced best practices in Git workflows, testing, and documentation.
- Developed a fully functional Learning Management System (LMS) that supports 650+ active users; adopted by the HR department as the primary internal learning platform for agents and still in use today

### FRONTEND / SYSTEMS DEVELOPER

JUN 2022 – JAN 2023

*Flavier La Verne*

- Provided software consulting and frontend development services for clients including **Four Seasons** and **Declutter**.
- Built responsive websites using **HTML, CSS, and JavaScript**, delivering clean UI layouts and stable user experiences.

## PERSONAL PROJECTS

- Built a company website for **JB Technologies (USA)** for professional service showcasing.
- Developed **Shades**, an AI-powered RFP assistant that extracts and automates data from messy emails and PDFs.
- Created a full **React online shop** with **PayPal sandbox integration** for secure payment processing.
